DETAILED ACTION

1. Claims 1-23 and 39 are pending in this communication filed 1/02/08 entered as RCE.
2. The Petition filed 1/02/08 was granted 1/07/08 and entered.
3. The IDS filed 1/02/08 has been considered and entered.

Continued Examination Under 37 CFR 1.114

4. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 1/02/08 has been entered.

5. An Examiner's Amendment appears here below. Authorization for this Examiner's Amendment was given in an e-mail September 28, 2007 by Mr. Charles (Chuck) Miller.

6. (Currently Amended) A computer-implemented method of processing derivative product orders at an exchange, the method comprising:

(a) receiving derivative product order risk data including at least one threshold value corresponding to at least one order risk parameter;

- (b) receiving from a trader an order for a derivative product;
- (c) utilizing the derivative product order and a trader's current order risk utilization state to calculate utilization data at a computing device; and
- (d) processing the derivative product order in a manner that is a function of the derivative product order risk data and the utilization data.

Allowable Subject Matter

7. Claims 1-23 and 39 are allowed.

The following is an examiner's statement of reasons for allowance: Stanley Kucemba, Brian Petrak, and Comerica Bank teach foreign exchange risk management but failed to teach utilizing the derivative product order and a trader's current order risk utilization state to calculate utilization data and process the derivative product order in a manner that is a function of the derivative product order risk data and the utilization data, determining a trader's current order risk parameter utilization value and executing the derivative product order when the trader's current order risk parameter utilization value does not exceed the threshold value in combination with the other claim limitations of claims 1 and 39.

The dependent claims 2-23 being further limiting to the independent claims, definite and fully enabled by the Specification are also allowable.

It appears that the instant invention is beyond the skill of one of ordinary skill in the art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been

able to predict the results, and as such, they would have had no capability of expecting success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
